Portfolio

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), Bash, SQL, HTML5, CSS3

OS, Cloud & DevOps: Linux/Ubuntu, Docker, Jenkins, CI/CD Pipelines, AWS (EC2, IAM, Lambda, CDN)

Frameworks & Libraries: React.js, Node.js, Express.js, Socket.io, Tailwind CSS

Databases: MongoDB, MySQL, NeonDB, Redis, Mongoose ODM

AI & Gen-AI: Prompt Engineering, LangChain, RAG pipelines, LLM APIs

Developer Tools: Git, GitHub, Linux Command Line, Postman, VS Code

EXPERIENCE

Full Stack Developer Intern

April 2026 – June 2026

Aascharya Wellness Private Limited

- Engineered highly resilient and performant full-stack solutions using **React.js**, **Node.js**, and **MongoDB**, implementing **Google OAuth 2.0** and server-side caching to reduce system latency by **40%**.
- Optimized enterprise cloud infrastructure by deploying assets via **AWS S3** and **CloudFront CDN**, streamlining media delivery pipelines and boosting production application performance by **60%**.

Software Development Intern

Nov 2025 – Jan 2026

AceMagick

- Architected a scalable serverless ecosystem via **AWS Lambda** and **API Gateway**, and engineered 15+ **Node.js REST APIs** for CRM integration, reducing manual data entry by 40%.
- Engaged in full-lifecycle development using **Git/GitHub**, executing comprehensive code reviews and **Postman** testing to achieve a 98% bug-free release rate, reflecting strong security and quality awareness.

PROJECTS

DevMeet (Networking Platform) | MERN, Socket.IO, LLM API, Linux, AWS | [Live Link](#)

- Developed a collaborative peer-learning platform featuring a **MongoDB aggregation**-based profile recommendation engine, integrating **Redis caching** to bypass heavy queries and reduce API latency by 85%.
- Architected a secure, **Linux-hosted** backend featuring a multi-layered authentication pipeline (JWT, bcrypt, OTPs) and **Cloudinary** integration for 40% faster asset delivery, successfully deployed on **AWS EC2**.
- Integrated an **LLM API** for a 24/7 study assistant and **Socket.io** for real-time peer messaging, focusing on responsive design and user experience to boost retention by 50%.

MotluPets (E-Commerce Platform) | MERN, Python, Docker, Ubuntu, AWS | [Live Link](#)

- Engineered a lightweight **Python** microservice utilizing LLM APIs and prompt engineering to deliver smart product recommendations alongside the core backend.
- Containerized application services with **Docker** and engineered a fully automated **Jenkins CI/CD pipeline** on an **Ubuntu AWS EC2** instance, streamlining model and app deployment times by 70%.
- Established optimized backend performance by implementing **Redis caching** for product data, improving average API response time by 35% and reducing cart abandonment by 15%.

EDUCATION

Oriental Institute of Science and Technology

Bachelor of Technology in Information Technology (CGPA: 7.59)

Bhopal, India

May 2022 – June 2026

Swami Vivekananda School

Higher Secondary (12th) - MPBSE – 95.8%

Rajgarh, India

2020 – 2021

ACHIEVEMENTS & CERTIFICATIONS

Achievements & Honors

- Demonstrated strong algorithmic and problem-solving proficiency by completing **250+ DSA questions** across competitive coding platforms.
- Designed scalable system architecture and led an **8-member team** to deliver all project milestones on schedule, showcasing personal responsibility and drive.
- Secured the **99th percentile** in the highly competitive Naukri Young Turk Competition.

Certifications

- NPTEL: Programming in Java | Meta Backend Developer | GitHub Foundations | AWS Fundamentals
